

7. What should Christian churches do to support a biblical view of marriage among its people—especially young people?

Note: With these questions, I am not addressing the final several paragraphs of this chapter. That is because they are based entirely on a certain cultural view related to Lewis's time and place, and cannot be substantiated by a legitimate interpretation of related biblical passages. For me, these paragraphs constitute the only serious flaw in *Mere Christianity*. That flaw should not at all diminish the force of the rest of the book or other works by the author.
